Profile

Entry-level professional with a strong work ethic, positive mindset, and team-first attitude, eager to support projects, learn quickly, and contribute wherever needed.

Education

BA Computer Science, *Queens College* 09/2020 – 12/2025
Queens, NY

Skills

Programming Languages	Web & Software Development	Databases	Technologies
Java, Python, C++, JavaScript	HTML, CSS, Node.js, REST APIs	MySQL	Github, VS Code, Linux

Experience

Family Caregiver 01/2022 – 01/2026

- Provided daily care and assistance for an elderly family member with dementia while maintaining full-time college coursework
- Demonstrated strong time management by balancing academic responsibilities with caregiving duties
- Developed problem-solving, patience, and communication skills in high-stress situations

Camp Counselor, *Old Westbury Day Camp* 06/2019 – 08/2023

Supervised daily activities, ensuring camper safety and enhancing their outdoor experience.
Facilitated arts and crafts sessions that fostered creativity and self-expression among campers.
Organized team-building exercises that strengthened cooperation and communication skills among participants.

Cashier & Rolled Ice Cream Maker, *Sweet Charlie's* 08/2021 – 04/2022

- Delivered excellent customer service and handled transactions, prepared rolled ice cream to order while maintaining food safety standards. Thrived in a fast-paced, customer-facing environment
- New Hyde Park, NY

Projects

Distributed Key-Value Store, *Designed and implemented a distributed key-value store using consistent hashing to support horizontal scaling. Modeled a circular hash ring and used binary search to efficiently map keys to nodes. Minimized data reshuffling during node additions and removals, improving scalability and fault tolerance.*
Python

Fantasy Football Weather Mashup, *Built a backend service integrating the Yahoo Fantasy Sports API and Open-Meteo API. Implemented OAuth 2.0 (three-legged) authentication for secure API access. Displayed real-time weather conditions for fantasy football lineups to enhance decision-making.*
JavaScript, Node.js

Interests

Sports, tabletop role-playing games, and karaoke
